Please assemble top and bottom frames according to relevant number

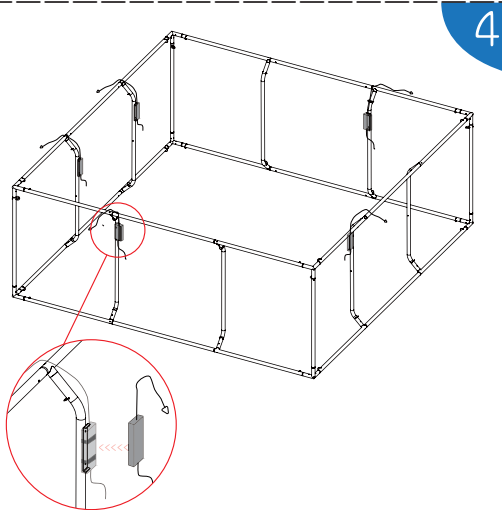

Assemble 4 corners' tubes according to the same label number

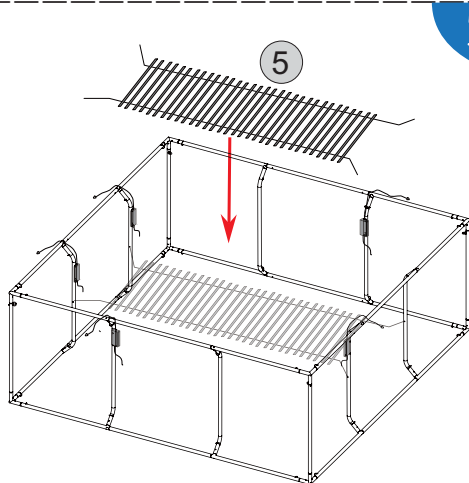

Assemble other else side tubes and screw them

INSTALLATION INSTRUCTIONS

10FT SQUARE HANGING LIGHT BOX

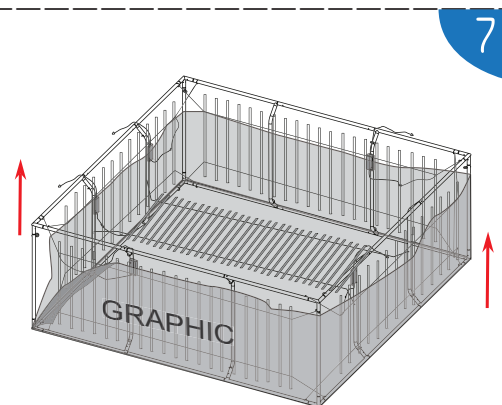

Fix transformers on the frame

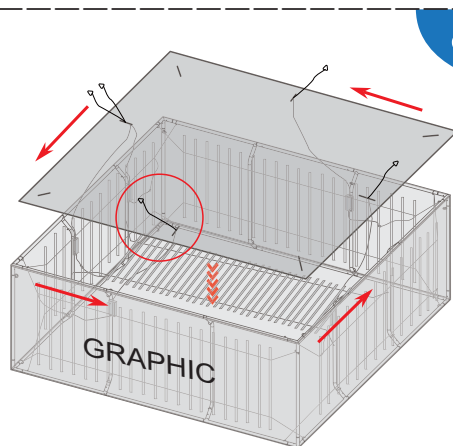

Assemble No.5 LED light first.
(Remark: No.5 LED light should face down, and power line should face the side with two transformers.)

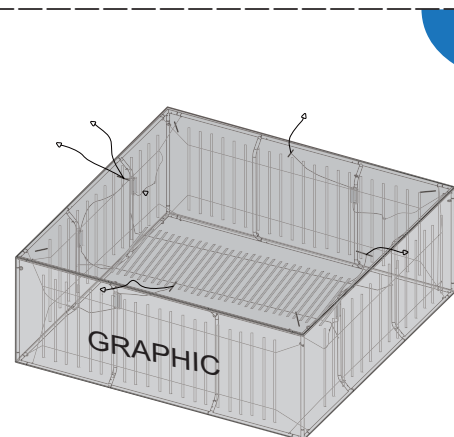

Assemble other else lights as the same label number.
(Remark: LED lights should face inside, and power lines are upward.)

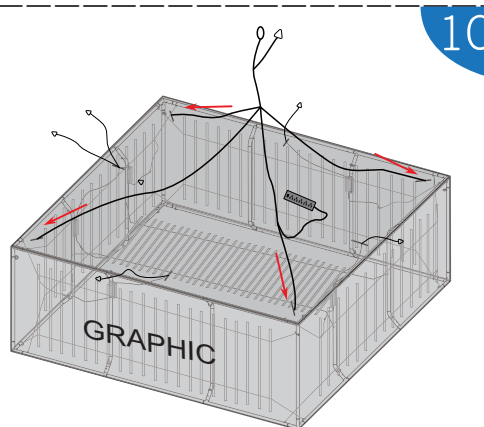

Put the graphic below the frame first, and zip it.
(Remark: LED lights should face inside, and power lines are upward.)

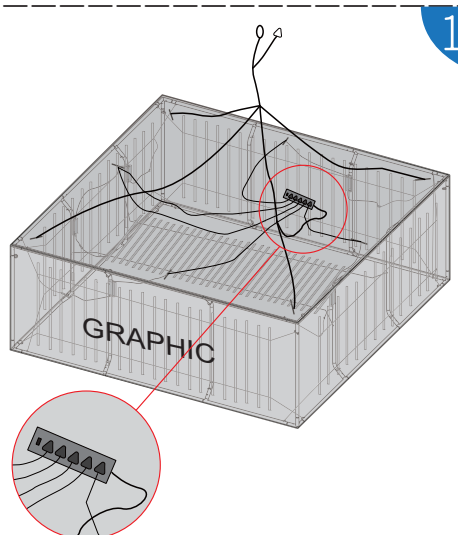

Assemble the top graphic.
(Remark: Pull out power lines from 4 sides' preformed holes.)

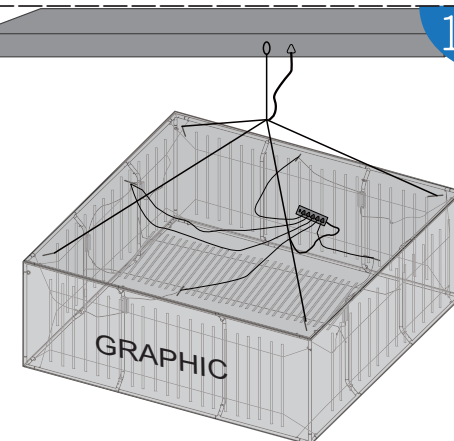

Zip the top graphic's zippers

Fasten steel wireropes to circular rings of corners' tubes. Pull out wireropes from 4 corners' preformed holes

Plug power lines in

Hang the light box and plug in, and done!
